For Aria, sustainability is not only confined to the person and the environment. With the simplicity and becoming an ambassador for a new model, you too can help make a difference, by choosing ARIA and becoming part of daily actions. From today, thanks to its research and development, there is now eco-friendly products that use natural refrigerants as an expanding agent in insulating foams that also act as a refrigerant in the refrigerator not only that use natural refrigerants but also as a refrigerant in the refrigerator.

You also help the environment by choosing ARIA to the product but encompasses a great deal more: it is also a production process and is, above all, respectful for the person and the environment. Aria is a refrigerant that is now available in a wide range of products, such as refrigerators, freezers, and air conditioners. It is also used in insulation, which is essential for energy efficiency. By choosing ARIA, you are making a difference in the way we live and work, and helping to protect the planet for future generations.
